

Question 6: What type of residence is this?

Originally, WPS did not include the categories of *Condo or Co-op* or *Res 2-6 Units*. Instead of those categories, surveyors were asked to identify if a building was a 2-, 3-, or 4-Flat. Residences larger than 4-Flats were tagged as Multifamily Apartments.

By matching WPS results with property codes from the County Assessor’s office, we were able to see where buildings were coded incorrectly and also add more granular property information to our dataset -- notably, the category of *Condo or Co-op*, which could not be parsed out during the original survey. Residential data was re-coded into the results presented here.
