

Question 8: Is the lot maintained?

After identifying the use, or lack thereof, of parcels without structures, surveyors were prompted to answer if the lot was maintained.

Signals of maintained lots include mowed grass and trimmed greenery, absence of litter, and properly lined parking lots. In Woodlawn, the 60% of lots without structures were in good condition.

Unmaintained lots show signs of overgrown greenery, broken glass or other materials, unofficial parking, discarded items or garbage (dumping), and a general lack of tending-to. Four out of ten properties lacking structures were unmaintained.
