

**Question 9: Is there dumping on the site?**

*Woodlawn Parcel Survey, 2017*

The final question of the WPS asks the surveyor to note if there are signs of dumping on the site--this question was posed whether a structure was present or not.

Dumping is defined as the inappropriate disposal of unwanted materials (garbage, waste, furniture or appliances) along streets, in front or side yards, or on vacant lots.

The results of the WPS show that dumping is more prevalent west of Cottage Grove, particularly along South Chicago Avenue. However, dumping was present in all quadrants to some degree.
